

Backlog

As the Jadcup owner I would like a local server to ensure only local users can access the system

HP

MH

As The owner of Jadcup, I would like a simulation of the factory to test the dashboard, so that I can ensure a safe testing enviroment

As the Owner of Jadcup I would like the dashboard to be able to modify the Simulation so that I can test the features before implementation

As a Jadcup floor manager, I want the interface to be able to modify the PLC so that I can quickly make changes in case of emergency

As a Floor manager at Jadcup I want the system to be fast so in emergencies we can quickly shut down machines

In Planning

2 / 5

as a Jadcup manager I want to be able to see readouts of data from the database, so I can understand how operations are progressing

As a Floor Manager, I want clear UI design so that I can effectively train staff to use the system quickly

In Development1 / 5

As a Jadcup manager I want changes in the simulation to reflect changes in the database for the collection of data
